

Polaroid Automatic 100 Battery Replacement

This is a step by step guide that explains how to replace the battery of your Polaroid 100 Automatic Land Camera.

Written By: Katie Miller

INTRODUCTION

The battery is a necessary component of the polaroid which powers the shutter to make it open and close, and powers the flash bulb (if you have one). The battery is located within your polaroid on the left side in its own compartment.

Step 1 — Battery

- Open the battery compartment on the back left of your Polaroid.

Step 2

- Carefully remove the battery from the positive and negative terminals.

To reassemble your device, follow these instructions in reverse order.
